

HONDA CIVIC (2000 to 2004)

How To Remove a Honda Civic Car Stereo (2000 to 2004)

Tools Required

Screw Driver

OEM Stereo Image:

Comments:

Tricky and time consuming.

Step 1

Start by popping off the gear stick gator.

Step 2

Now put your hand in the hole where the rubber was and pull up carefully, unclipping the gear stick silver surround.

Step 3

You should now see two screws, one on each side under what is left of the center dashboard.

Step 4

Once undone, on some cars there are some 8mm bolts which you can access with a spanner, undo these. You may need to go through the glove box to get to one of them! This should now allow you to lift the top radio part off.

Step 5

Then un-clip the top.

Step 6

Now disconnect the wiring and aerial plugs and any switch wires you see. The radio can now be removed from the fascia panel
